

Water is
precious.
Let's not
waste it.

Did you know?

Using the
dishwasher's
'eco' setting can
save on average
3 litres per cycle?

Filling up a washing
bowl or using the
sink's plug, rather
than running the
tap, saves on
average **5 litres**
of water per day?

Only filling the
kettle with what
you need **saves**
water and energy

Do you want to save water at home? Why not try
our Get Water Fit calculator. Find out how much you
could save and order free water saving products!
