

Water Efficiency Audit

We can help you take action to reduce water wastage in your business with our Water Efficiency Audit. This can help to cut your overheads by lowering your water and energy bills. This also reduces your carbon footprint and is much better for the environment.

Companies that adopt a systematic approach to water reduction typically achieve a 20% - 50% decrease in the amount of water they use, which leads to financial savings on both water supply and wastewater disposal.

Our Water Efficiency Audit is an assessment of 'domestic' water use on your site, such as toilets, taps, kitchens and cleaning facilities.

The aim of this audit is to find ways of saving water to help you reduce your business costs.

The work will include a selection of the following activities, which will help identify the products your business may need to be more water efficient:

- Inspection and assessment of domestic water systems (e.g. assessing urinal cistern control mechanisms).
- Analysing meter readings to determine water consumption patterns.
- Assessing possible extent of water wastage.
- Commenting on water management procedures, if appropriate.
- Recommending water efficient fixtures and fitments in a formal report.
- Summarising total potential water savings and payback periods.

Archwiliad Effeithlonrwydd Dŵr

Gallwn ni'ch helpu i gymryd camau i wastraffu llai o ddŵr yn eich busnes gyda'n Harchwiliad Effeithlonrwydd Dŵr. Gall hyn eich helpu i leihau'ch gorbenion trwy ostwng eich biliâu dŵr ac ynni. Mae hefyd yn lleihau'ch ôl troed carbon ac mae'n well o lower i'r amgylchedd.

Fel rheol, mae cwmnïau sy'n mynd ati mewn ffordd systematig i ddefnyddio llai o ddŵr yn llwyddo i sicrhau gostyngiad o 20% - 50% yn swm y dŵr a ddefnyddiant. Mae hynny'n golygu eu bod yn arbed arian ar filiâu dŵr a gwaredu dŵr gwastraff.

Mae ein Harchwiliad Effeithlonrwydd Dŵr yn asesiad o faint o ddŵr a ddefnyddir ar eich safle at ddiibenion 'domestig' fel toiledau, tapiâu, ceginau a chyfleusterau glanhau.

Nod yr archwiliad yw canfod ffyrdd o arbed dŵr i'ch helpu i leihau costau'ch busnes.

Bydd y gwaith yn cynnwys rhai o'r gweithgareddau isod, er mwyn helpu i ganfod y pethau y gall fod ar eich busnes eu hangen i ddefnyddio dŵr yn fwy effeithlon:

- Archwilio ac asesu systemau dŵr domestig (e.e. asesu mecanweithiau rheoli sestonau wrinalau).
- Dadansoddi darlenniadau'ch mesurydd i ganfod patrymau defnyddio dŵr.
- Asesu faint o ddŵr a wastreffir o bosib.
- Cynnig sylwadau am drefniadau rheoli dŵr, os yw'n briodol.
- Adroddiad ffurfiol yn argymhell ffitiadau sy'n arbed dŵr.
- Gwneud crynodeb o gyfanswm posibl yr arbedion dŵr a'r cyfnodou talu yn ôl.

Cysylltwch â ni i weld sut y gallai'r gwasanaeth hwn fod o fudd i'ch busnes chi
